4300 Cherry Creek Drive South  
Denver, Colorado 80222-1530

Request Regulatory Relief

Gentlemen:

The Department of Energy (DOE) is requesting regulatory relief from quarterly sampling for the OU 1 IM/IRA. Specifically, we recommended requesting relief from sampling at the following surface water locations: SW035, SW036, SW038, and SW070. These locations were originally canceled from the sitewide surface water program and then were included in the OU 1 French Drain Performance Monitoring Plan. While these stations have been sampled as part of the OU 1 IM/IRA performance monitoring, these data have not been reported in the quarterly reports.

In addition, it is proposed to eliminate the sampling at the collection well and the french drain for PCB/pesticides and semi-volatile constituents. No significant contamination from these parameters has been detected since April 1992. Further, the OU 1 IM/IRA does not require these parameters to be monitored in the effluent prior to discharge.

If you concur with this proposal, please sign below and return a copy to me. If you wish to discuss this proposal, please call me as soon as possible, at 966-4839, as sampling is scheduled for late December.

Sincerely,

Steven W. Slaten  
IAG Project Coordinator  
Environmental Programs

Joe Schieffelin

Tim Rehder
